

# IMPERIAL VALLEY **REGIONAL** CHAMBER *of* COMMERCE

October 2, 2025

Controlled Thermal Resources

To Whom it May Concern,

As a representative of Imperial Valley Regional Chamber of Commerce, I am writing to express our support for the Hell's Kitchen project being developed by Controlled Thermal Resources (CTR). This project presents a meaningful opportunity to uplift our community, not only through economic development, but by expanding access to education, skills training, and long-term employment. CTR's commitment to hiring locally for over 95% of its project jobs, including roles accessible to high school graduates, directly supports the kind of outcomes that align with our mission to serving Imperial Valley businesses and promoting community prosperity through economic development and business education.

We are also encouraged by CTR's commitment to sustainability and long-term community engagement. As the region grows, organizations like ours stand to benefit from new partnerships, increased philanthropic interest, and the ability to reach more people through expanded networks and resources. We see enormous potential in working alongside CTR and other stakeholders to ensure that the benefits of this project reach every corner of the community, especially those who need it most. This development offers a foundation for meaningful, generational change and local economic empowerment, including additional tax revenue to support infrastructure upgrades, schools, workforce training, health, and Salton Sea restoration efforts. For these reasons, we support the Hell's Kitchen project and look forward to the positive and lasting impact it will bring to our region.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Victor Nava', with a long, sweeping flourish extending upwards and to the right.

Victor Nava  
President
